	Number of Titles In My Movie Library	*Number of Emojis Supported by Unicode*
Number of Titles In My Movie Library	1	
Number of Emojis Supported by Unicode	0.959482698	1

Interpretation: Unicode, in its mission to reflect global communication trends, expands its emoji set to match the emotional and symbolic diversity found in popular media. Therefore, each new movie I add to my personal library subtly influences the collective demand for new emojis. Buying less movies is likely a reflection of decreasing public media consumption at large, and that lack of cultural shift results in less need/demand for new emojis.
